

Noah's Ark Nursery Schools Emergency Evacuation – Contingencies

If the nursery buildings have to be vacated for gas leaks, bomb alerts etc., the children will be evacuated using the standard fire drill, and will assemble at the appropriate assembly point.

Staff must take the daily register and the emergency contact details with them, along with the available mobile phones.

Parents will only be asked to pick up their children from the appropriate assembly point if it became evident that we were unable to go back to the nursery buildings.

If there is a chemical attack, remain in the building, shut all the windows and doors and await instructions from the police.

Each school has an Emergency Evacuation Plan which includes details of an alternative site in which to assemble if the nursery remains closed and/or the immediate area is cordoned off.
